

Ceiling-mounted Epson EB L210 Laser Multimedia Projectors

These two ceiling-mounted projectors deliver high-definition visual output directly to the main wall mounted presentation screen.

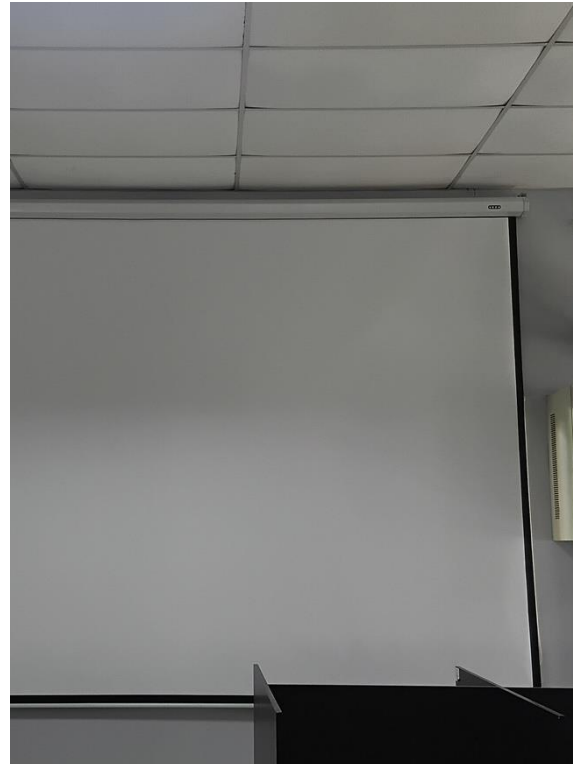

Ceiling-Mounted Epson EB W53 Multimedia Projector

Additionally, these two ceiling mounted multimedia projectors deliver high-definition visual out put directly to the presentation screens.

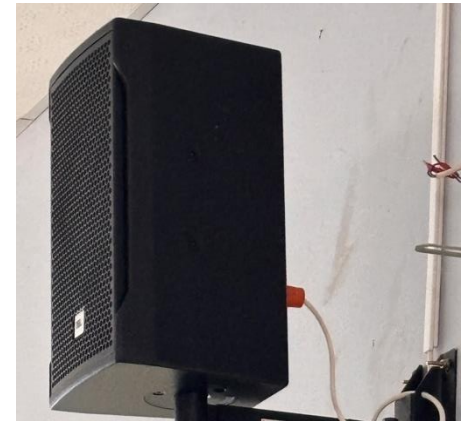

Vega 4x3 m wall mounted Electric Projector Screens

These wall-mounted electric projector screens enable the display of multimedia presentation of lecture content.

Wall mounted JBL passive speakers

These four wall mounted passive speakers ensures a balanced, clear voice and audio distribution across this large computer lab.

JBL Dual Channel microphone system with bodypack transmitters and clip-on microphones

A The four wireless clip-on microphones enable hands-free speaking during multi-person panel discussions, presentations, or performances where mobility and subtle microphone placement is important.

A

B The two JBL wireless microphone receivers enable the transmission of clear wireless audio signals from speakers without cable hazards.

B

JBL dual channel microphone system with handheld microphones

A The two hand-held wireless microphones with channel identification ensures quality audio distribution during multi-speaker presentations, live performances, or interactive Q&A sessions.

A

B Dual-Channel receiver base provides reliable, cable-free audio capture and uninterrupted signal transmission for main venues or stage setups.

B

JBL 3 pin Headset for wireless microphones

These four headsets provide hands-free, consistent audio pick-up while remaining visually discreet for live speaking, presentations, stage performances or video recordings.

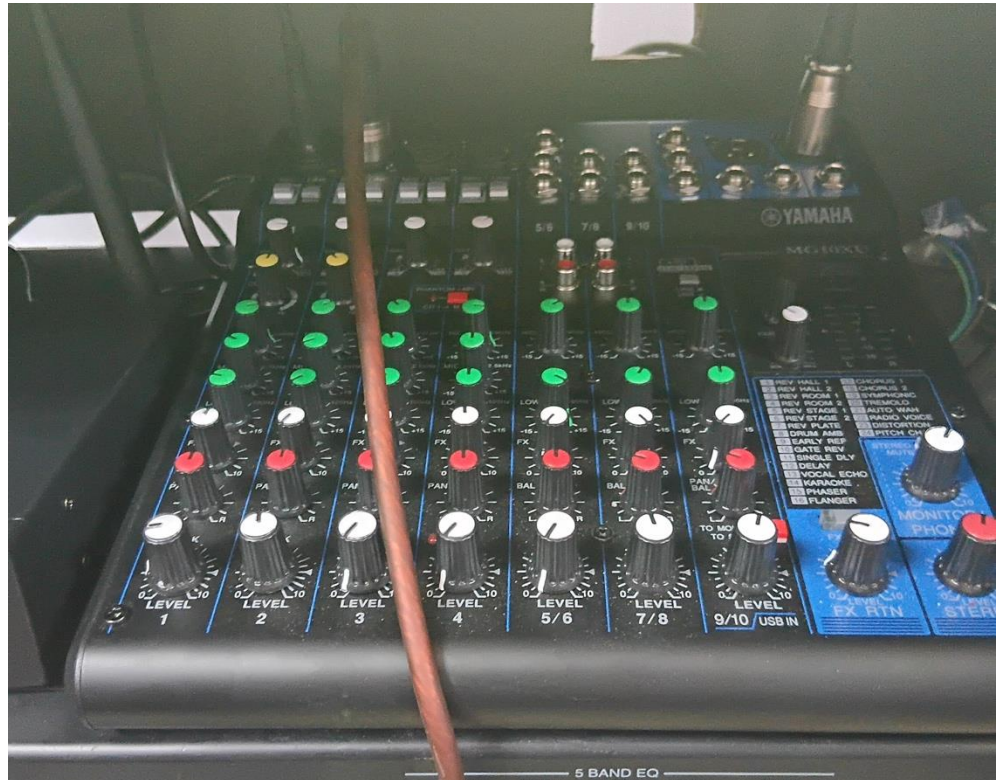

TOA Podium microphone EM 380AS

A flexible, directional condenser microphone mounted on a heavy desktop base with an integrated push button and XLR connection. It is designed for lecterns, podiums, conference tables, or press desks. It delivers clear, targeted voice pickup while over riding background noise during formal speeches, board meetings, and panel discussions.

Yamaha MG10XU Mixer

Centralized audio control, allowing fine-tuning of multiple microphone and media audio inputs.

10m microphone cable

This cable provides a balanced, secure physical connection for professional audio equipment, microphones, or specialized data sensors.

10m Audio Cable

These two cables extends signal transmission between audio/sensor hardware and recording or control units.

System Stand with Caster wheel

The system stand serves as the main hub housing rack-mounted signal processors/receivers, a podium microphone setup and secure storage for sensitive equipment.

Rechargeable battery pack with chargers

These rechargeable batteries and charger for 4 batteries provides reliable, reusable power to portable wireless devices alongside a 4-slot smart charger.

The Computer Lab

The view of the Computer Lab depicting the overall infrastructure, combining individual student workstations/cubicles with centralized audiovisual presentation tools.

The Computer Lab following the installation of PUAAN funded audio-visual equipment (video).
